https://mohsin-portfolio-26.vercel.app

Frontend Engineer with ~4 years of experience building scalable React applications, configurable business workflows, dynamic forms, API integrations, and performance-optimized user interfaces. Expanding into full-stack development through hands-on projects with Next.js, Node.js, Express.js, MongoDB, Mongoose and REST APIs.

Experience

FynTune Solution Private Limited | Senior Software Engineer December 2022 – Present

ICICI Prudential - Rewards And Recognition (RNR)

- Platform for configuring and calculating commissions, incentives, goalsheets, and rewards based on policy transactions and business rules across channels, intermediaries, and employees.
- Led a team of 4 frontend developers, coordinating task allocation, development activities, code reviews, technical guidance, and ensured coding standards and consistent architecture across the team.
- Collaborated with business stakeholders and backend teams to gather, analyze, and clarify requirements, translating complex business rules into scalable frontend workflows and configurations.
- Participated in feature planning, estimation, production issue resolution and releases, ensuring timely delivery of business-critical features.

BroCore - Policy Data Warehouse

- Developed a configurable dynamic form builder supporting text, dropdowns, date pickers, file uploads, field sequencing, character limits, editability, mandatory fields, and validation groups.
- Built a Policy Entry system that dynamically consumes form configurations, enabling flexible policy data capture across different business requirements.
- Developed a multi-level nested stepper workflow with dynamic field rendering and conditional validation to manage complex hierarchical policy data.
- Scaled the solution to support 25+ lines of business, including Health, Motor, Term Life, Travel, and Marine, while improving reusability and maintainability of policy configurations.

Shajra – Family Tree | Personal Project | https://shajra-next.vercel.app

- Developed Shajra, a full-stack family tree management application that enables users to create, manage, and visualize family relationships and interconnected members.
- Built a responsive user interface using Next.js, React.js, and TypeScript, with reusable components, API integration, and interactive family tree visualization.
- Migrated the application from a separate React.js frontend and Express.js backend to a unified Next.js architecture, integrating backend API routes using the App Router.
- Implemented API functionality for authentication, family relationships, invitations, and CRUD operations, backed by MongoDB and Mongoose data models.
- Implemented JWT-based authentication, protected routes, role-based authorization and error handling; deployed the application using Vercel and MongoDB Atlas.

Technologies And Skills

- **Frontend Development:** React.js, Next.js, JavaScript (ES6+), TypeScript, React Hooks, Custom Hooks, Controlled Components.
- **UI and Styling:** Tailwind CSS, Material UI (MUI), Headless UI.
- **State Management and Data Fetching:** Redux Toolkit, Zustand, TanStack Query, REST APIs, Axios.
- **Forms and Validation:** React Hook Form, Yup, Zod.
- **Backend and Database:** Node.js, Express.js, MongoDB, Mongoose, JWT Authentication.
- **Tools and Build Systems:** Git, GitHub, Vite, Turborepo, npm, Yarn.

Education

Bachelor Of Engineering, (Rashtrasant Tukadoji Maharaj Nagpur University), (2016-2020) CGPA - 8.49 / 10
